

BUILDING A BETTER FUTURE

This year's Extended School Year program centers on building a better future, where students will strengthen academic and life skills through hands-on activities inspired by building, design, and architecture, such as constructing models, collaborative problem-solving projects, creative design challenges, and structured activities that encourage teamwork, planning, and innovation.

ESY offers the following program strands for Pre-School to Transition ages:

- Academic/Life Skills
- Academic/Therapeutic
- Academic/Language-Based

This allows us to continue to meet diverse learners' needs including:

- Autism Spectrum Disorders
- Emotional/Behavioral Needs
- Global Impairments
- Cognitive/Intellectual Disabilities
- Language Disorders
- ADHD
- Specific Learning Disabilities
- Difficulties with Executive Functioning
